

— PRE-ENGINEERED BUILDING CONTRACTORS · KADAPA, ANDHRA PRADESH

Pre-Engineered Steel Buildings, Built to Last.

Design, fabrication and erection of PEB factories, warehouses, industrial sheds and structural steel across Andhra Pradesh, Telangana, Tamil Nadu and Karnataka.

Built on Engineering, Not Guesswork.

KVK PEB Solutions is a pre-engineered building and steel-structure contractor working out of Kopparthi, in the YSR Kadapa district of Andhra Pradesh. We design, fabricate and erect steel buildings — factories, warehouses, industrial sheds, open storage structures, mezzanine floors, roofing and facade works.

We work as a single accountable team. The people who survey your site are connected to the people who produce the drawings, who are connected to the people who fabricate the steel and put it up. There is no gap between a designer and a contractor for a problem to fall into, and one number to call when you want to know where your building is.

What “Quality is Everything for Us” means in practice

The specification is written down before the order is placed. Members arrive cut and drilled to the drawing, not adjusted on site with a grinder. The laps and flashings on a roof are done properly the first time — because the second time is always someone else's monsoon.

PROFILE OF THE DIRECTORS

Mr. Vijaya Kumar

MANAGING DIRECTOR

Brings over 15 years of extensive professional experience in business management, operations and strategic planning. His leadership and vision have played an important role in guiding the organisation toward sustainable growth and development.

Mr. Praveen

DIRECTOR

Over 10 years of professional experience in civil engineering, project management and commercial activities. His technical expertise, practical knowledge and commitment contribute significantly to the company's projects and overall performance.

Solutions — Buildings & Roofing

From a single storage shed to a full manufacturing plant — designed, fabricated and erected in-house.

Pre-Engineered Buildings (PEB)

Complete pre-engineered steel buildings — designed, fabricated and erected by one accountable team.

- ✓ Structural design to IS codes
- ✓ Tapered built-up or hot-rolled primary framing
- ✓ Cold-formed Z and C purlins and girts
- ✓ Fabrication, transport and site erection

Warehouses & Industrial Sheds

Clear-span storage and industrial sheds that keep the floor free of columns and the goods dry.

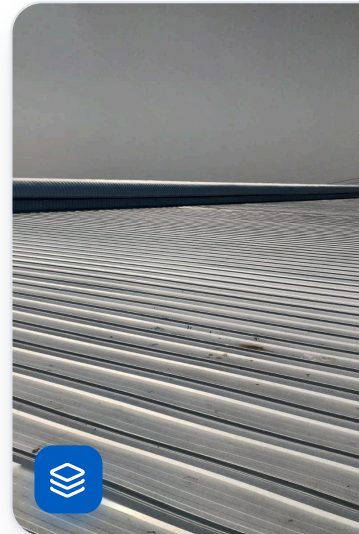

- ✓ Clear-span frames, no internal columns
- ✓ Eave heights set for racking and handling
- ✓ Ventilators and translucent skylights
- ✓ Optional insulation for sensitive goods

Factory & Manufacturing Buildings

Production buildings designed around the machinery, the crane loads and the way people move.

- ✓ Designed for EOT and gantry crane loads
- ✓ Crane runway beams and brackets
- ✓ Multi-bay and multi-span layouts
- ✓ Mezzanine floors for offices and stores

Roofing & Wall Cladding

Colour-coated sheeting, standing-seam roofs, skylights and ventilators — installed to stay watertight.

- ✓ Colour-coated profiled roof and wall sheets
- ✓ Standing-seam roofing systems
- ✓ PUF and rockwool insulated panels
- ✓ Re-roofing of existing buildings

Solutions — Steel, Mezzanines, Facades & Sheds

Every solution is delivered by the same team that surveyed the site and drew the structure.

Structural Steel Fabrication & Erection

Fabrication and erection of columns, rafters, trusses, beams, platforms and supporting steelwork.

- ✓ Built-up and hot-rolled sections
- ✓ Trusses, columns, rafters and bracing
- ✓ Platforms, staircases and handrails
- ✓ Anchor bolts, base plates and grouting

Mezzanine Floors & Multi-storey Steel

Extra floor area inside the building you already have — or a full multi-level steel structure.

- ✓ Mezzanines designed for the real imposed load
- ✓ Chequered plate, grating or composite decks
- ✓ Multi-storey steel frames
- ✓ Steel superstructures over an RCC base

Facade, Glazing & ACP Cladding

The elevation people actually see — structural glazing, ACP cladding and feature entrances.

- ✓ Structural and semi-unitised glazing
- ✓ Aluminium composite panel cladding
- ✓ Entrance canopies and porticos
- ✓ Louvres, fins and sun-shading

Open Sheds, Canopies & Storage Structures

Open-sided sheds and canopies that keep material, vehicles and work areas out of the sun and rain.

- ✓ Framing designed for open-structure wind loads
- ✓ Cantilever and column-supported canopies
- ✓ Parking sheds and covered walkways
- ✓ Gable and partial side cladding

Five stages. One point of responsibility.

From the first site visit to handover, the same team carries the job — so the programme and the finished quality have one owner.

What we need from you to quote

Length, width and eave height · site location · what the building will be used for · any crane beam, mezzanine or glazed facade. A sketch or a photograph of the site helps.

Have drawings already?

We can build to a design you already have, or produce the structural design ourselves from your requirements — clear span, eave height, crane loads, wind zone and intended use.

Erection in progress — Chennai, Tamil Nadu

The things that decide whether a steel building is a good one.

No slogans — these are the six habits we are prepared to be held to on every site.

Quality materials

Steel sections, fasteners and colour-coated sheets from established suppliers, with the specification agreed in writing before the order goes out.

Engineered to IS codes

Every structure is designed to the relevant Indian Standards for dead, live, wind and, where they apply, crane loads.

Transparent pricing

A written quotation that sets out the scope, the specification and what is excluded — so you can compare it properly.

Safety-first sites

Height work, lifting and site housekeeping are planned before the crew arrives, not improvised on the day.

On-time delivery

A programme agreed at the start, with fabrication and erection sequenced so the site is never waiting on a drawing.

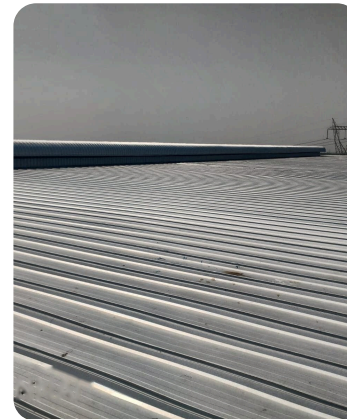

After-sales support

We stay reachable after handover for maintenance, extensions and any snag that turns up later.

Structures engineered to IS codes · Materials we can stand behind · Handed over on the date we agreed

FEATURED PROJECT

Industrial Building with Glass Facade

📍 Chennai, Tamil Nadu

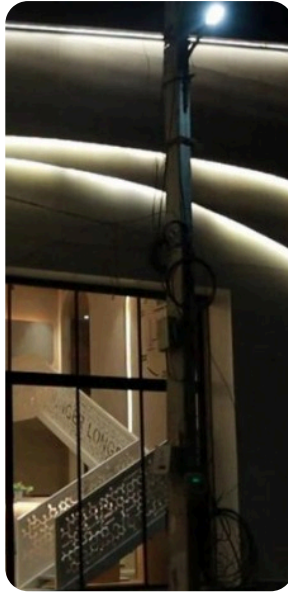

PEB industrial building with colour-coated wall cladding, a glazed feature facade, entrance canopies and roof skylights. Completed alongside a second Chennai project on the same day.

CATEGORY Industrial Shed

COMPLETED 29 May 2026

SCOPE PEB · Structural steel · Facade glazing · Roofing & cladding

Commercial & multi-storey steel.

Sri SKS Building

📍 Tirupati, Andhra Pradesh

Commercial building with a curved feature facade, recessed cove lighting and a full-height glazed entrance.

CATEGORY Commercial Building

SCOPE PEB · Structural steel · Facade & glazing

Two-Storey Industrial Building

📍 Chennai, Tamil Nadu

Pre-engineered steel superstructure with metal cladding over a two-level RCC base.

CATEGORY Factory Building

COMPLETED 29 May 2026

SCOPE PEB · Structural steel · Mezzanine / multi-storey

Delivered across South India.

Industrial sheds, factories, open storage structures and hospitality steelwork — in Andhra Pradesh, Telangana, Tamil Nadu and Karnataka.

COMMERCIAL BUILDING

Sreenath Functional

📍 Galiveedu, Andhra Pradesh

Large multi-bay steel structure with blue-and-grey profiled cladding.

FACTORY BUILDING

BIMAL Corporation

📍 Bengaluru, Karnataka

Two-level industrial facility with steel roof structure and profiled wall cladding.

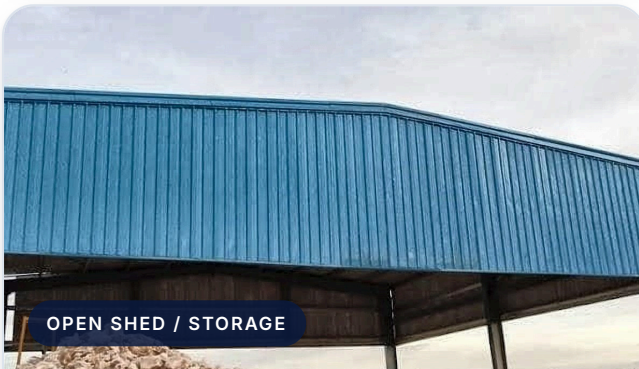

OPEN SHED / STORAGE

JK Tyres

📍 Nellore, Andhra Pradesh

Long-span open-sided steel shed with colour-coated roofing and gable cladding.

OPEN SHED / STORAGE

KPCL

📍 Nellore, Andhra Pradesh

Open material-storage shed with steel columns and colour-coated roof sheeting.

HOSPITALITY

Marriott Hotel

📍 Bengaluru, Karnataka

Structural steel and facade-related works at a hotel site.

Your building next?

Every project here started with a site visit and a written quotation. Call **+91 94412 07215** to book yours.

Every sector loads a building differently. We design for the one you are actually in.

Manufacturing & Factories

Production buildings sized around the machinery, the crane loads and the movement of material through the plant.

Warehousing & Logistics

Clear-span storage buildings and distribution sheds with the eave height and door arrangement the handling equipment needs.

Automotive & Tyres

Storage and production structures for automotive and tyre operations, including long-span open sheds for bulk stock.

Power & Energy

Structures and covered storage for power and energy sites, including equipment supports and material sheds.

Hospitality & Commercial

Structural steel, facade and roofing works for hotels, showrooms and commercial buildings.

Agro & Food Processing

Processing and storage buildings for agricultural and food operations, with ventilation and hygiene in mind.

Function Halls & Community

Large column-free halls for functions, gatherings and community use, with clear sightlines throughout.

Long-span open shed · Nellore

Two Projects Completed in Chennai.

📅 29 May 2026

On 29 May 2026, KVK PEB Solutions completed two industrial building projects in Chennai, Tamil Nadu — a glass-facade industrial building combining a pre-engineered steel structure with colour-coated cladding, entrance canopies and roof skylights, and a two-storey industrial building with a PEB superstructure over a two-level reinforced-concrete base.

Both projects extend our work beyond Andhra Pradesh into Tamil Nadu, alongside our completed projects in Karnataka.

Kadapa as our base. South India as our site.
